1. Discussed with Mr. Detweiler and Mr. Little in charge of Reproduction and Printing, AEC problem of CIA printing plant. They had not previously heard of this project and left the door open for its consideration when final decisions have been reached and the plant placed under construction.

2. Discussed with Mr. Warner, Registrar of Copyrights, question of whether there is any necessity of action by this Agency on H. R. 6072. It is an amended copyright to include certain code writings. It is his opinion that no action on our part will be necessary. I have also discussed with him the immunity of Government employees from suit for copyright infringement.
